

IN THE CLAIMS:

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~strikethrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Please AMEND claim 1 and ADD new claims 9 and 10 in accordance with the following:

1. (CURRENTLY AMENDED) An information providing apparatus that provides information to a terminal of a user through a network, comprising:
 - a storage unit ~~for~~ storing environmental conditions that are predetermined conditions for an event relating to information provided by a predetermined information provider;
 - a control unit ~~for~~ acquiring user conditions from the terminal of the user through the network, the user conditions being that are inputted input by the user and ~~that are the conditions relating to and being specific to the user, from the terminal of the user through the network;~~ and
 - a structuring unit ~~for~~ structuring, in conformity with the environmental conditions, detailed information related to the event including information customized for the user in accordance with the user conditions, that is the information corresponding to the user conditions relating for the event, wherein and
where the control unit distributes the detailed information to the terminal.
2. (ORIGINAL) The information providing apparatus according to claim 1, wherein the storing unit stores the user conditions, wherein
after the user conditions are stored in the storing unit, the control unit extracts, in conformity with another request for the detailed information from the user, part corresponding to the user conditions stored in the storage unit, of other user conditions corresponding to the another request for the detailed information, and acquires part not corresponding thereto through an input by the user, and wherein
the extracted part can be changed by the user.
3. (ORIGINAL) The information providing apparatus according to claim 1, wherein the structuring unit executes at least one program for creating the detailed information.

4. (ORIGINAL) The information providing apparatus according to claim 1, wherein the structuring unit has a plurality of programs for creating the detailed information, selects one program in response to at least one of the nature of the event, the environmental conditions and the user conditions and executes the selected program.

5. (ORIGINAL) The information providing apparatus according to claim 1, wherein, when a predetermined condition among the user conditions is not yet set, the structuring unit temporarily sets at least one set value that the predetermined condition may take and creates the detailed information using the set value.

6. (ORIGINAL) The information providing apparatus according to claim 1, wherein, with the change of the environmental conditions, the structuring unit re-creates the detailed information about the event based on the changed environmental conditions at a timing designated by the user, and wherein
the communication unit distributes the re-created 5 detailed information to the user.

7. (ORIGINAL) The information providing apparatus according to claim 1, wherein information provided by the information provider is a news article or a publicity provided over a network.

8. (ORIGINAL) The information providing apparatus according to claim 7, wherein the information providing apparatus is linked via a network with a site on the network for providing the news article or the publicity.

9. (NEW) A method of providing information using a terminal of a user connected with a network, comprising:

applying user set conditions that are specific to the user to predetermined conditions defined by an information provider to customize the information; and

distributing the customized information to the user via the terminal connected with the network.

10. (NEW) A method of providing data from an information provider to a user, comprising:

customizing the data from the information provider responsive to a request from a user to use the data, the data being customized in accordance with conditions specific to the user for making the data specific to the user and conditions defined by the information provider; and presenting the customized data to the user.
